

Emergency Preparedness Plan - Little Roots Home Daycare

Program Information

Childcare Name: Little Roots Home Daycare

Address: 8627 185th St Ct E, Puyallup WA 98375

Nearest Cross Street: 185th St Ct E and 86th Ave E

Phone: 425-429-8058

Provider: Yalda Barghi

Purpose of the Plan

This Emergency Preparedness Plan explains how Little Roots Home Daycare will respond to emergencies such as fire, earthquake, evacuation, lockdown, and other disasters. The purpose is to protect children and follow Washington State WAC 110-300 emergency preparedness requirements.

Emergency Notification

In an emergency the provider will remain calm and communicate with children using simple language. If emergency assistance is needed the provider will call 911. Parents or guardians will be notified as soon as children are safe.

Emergency Alarm and Calling 911

In an emergency, the provider will verbally alert children and use a loud voice to ensure all children are aware of the situation. A non-verbal alarm method, such as a whistle, will also be used to alert children during emergencies. The whistle will be kept on the provider or near the main exit for quick access. If needed, a phone will be used immediately to call 911. Emergency services will be contacted as soon as it is safe to do so.

Actions When an Emergency is Discovered

The provider will immediately assess the situation, alert children, gather emergency supplies, and follow the appropriate emergency procedures.

Evacuation Procedures

If evacuation is necessary the provider will gather all children and exit the home using the nearest safe exit. The provider will bring the emergency contact binder, first aid kit, attendance record, and any necessary medications.

The provider will account for every child during evacuation. Children who cannot walk independently, including infants or children with special needs, will be assisted during evacuation. Infants may be carried or placed in a safe evacuation device if available. The provider will ensure all children are safely evacuated and accounted for.

Primary Evacuation Location

The primary evacuation meeting location is the front yard near the front door.

Alternate Evacuation Location

If the primary location is not safe, children will move to the fenced backyard or to the nearby neighborhood playground located at:

Near 185th St Ct E, Puyallup, WA 98375 (neighborhood playground)

Children will remain there until it is safe to return or until parents arrive.

Items Taken During Evacuation

Emergency contact binder, attendance record, first aid kit, and child medications.

Maintaining Supervision and Accounting for Children

The provider will maintain supervision of all children and ensure every child is accounted for during evacuation or emergency situations.

Parent Communication and Reunification

Parents will be notified as soon as children are safe. Children will only be released to authorized individuals listed on the enrollment forms.

Communication will be made by phone call, text message, or through the childcare app (if used).

Parents will be informed of the situation, the child's condition, and the child's current location for pick-up.

If parents cannot reach the program for up to three days the provider will continue caring for children using stored emergency supplies until families or emergency officials arrive.

Fire Procedures

If fire or smoke is detected the provider will alert children immediately, evacuate through the nearest safe exit, call 911 once outside, and gather children at the front yard evacuation location.

Earthquake Procedures

If an earthquake occurs inside the home children will drop cover and hold away from windows and heavy furniture. If outside children will move to an open area away from buildings and power lines. After the earthquake the provider will account for all children and check for injuries.

After an earthquake, the provider will assess the safety of the environment and follow guidance from local emergency services or authorities to determine if the licensed space is safe before children return inside. After an earthquake, the provider will check the home for hazards such as gas leaks, structural damage, broken glass, or unsafe conditions.

The provider will follow guidance from local and state officials, including emergency services, fire department, and public safety alerts, to determine if the licensed space is safe.

Children will not return inside the home until it is confirmed safe. If the home is not safe, children will remain at the designated evacuation location until picked up by parents.

Lockdown or Shelter in Place

If there is a dangerous situation near the home the provider will lock doors and windows, move children to a safe interior area away from windows, and remain there until authorities indicate it is safe.

Emergency Supplies

The program maintains emergency supplies including food, water, flashlight, first aid kit, and emergency contact information. Emergency food and water are stored in the pantry and kitchen cabinets.

Emergency Contact Binder

The emergency contact binder containing children's contact information and medical information is stored in the teacher basket near the entrance.

First Aid Kit

The first aid kit is located on the top shelf in the nap room near the entrance.

Provider Injury Plan

If the provider becomes injured and cannot supervise children the provider's husband will assist with children and parents will be contacted immediately to pick up their children.

Three Day Emergency Supply

The program maintains a three day supply of food and water for children and the provider in case families cannot reach childcare during an emergency.

Emergency Drills

Fire evacuation drills will be practiced once each month. Earthquake, lockdown, or shelter in place drills will be practiced at least once every three months. Drills will be recorded with the date, time, number of children present, and notes.

Floor Plan Description

The licensed childcare space is located on the main level of the home.

1. The front door opens into a small hallway and serves as the main emergency exit.
2. The child room is located on the right side of the hallway and has a window that may be used as an emergency exit.
3. The living room is straight ahead from the hallway and includes French doors used as an emergency exit.
4. Stairs are located on the right side of the living room and are blocked with a safety gate.

5. The bathroom with a handwashing sink is located near the stairs.
6. The closet is located next to the bathroom and in front of the stairs.
7. The second living room is separated by a gate and used to keep the dog separate during meals and nap time.
8. The kitchen is next to the second living room and is not accessible to children.
9. The fenced backyard is accessible through the door between the kitchen and second living room.

Evacuation Floor Plan

A copy of the evacuation floor plan is attached to this emergency plan. The floor plan clearly identifies all rooms, emergency exit pathways, emergency exit doors, and emergency exit windows. All exits are labeled and highlighted for easy identification.

Evacuation Routes

1. The child room window leads to the front yard which is the primary meeting location.
2. The living room front door leads to the front yard.
3. The living room French doors lead to the front yard.
4. The second living room door leads to the backyard which is the alternate evacuation location.
5. The backyard may lead to the nearby community park if evacuation away from the property becomes necessary.

Plan Review

This emergency preparedness plan will be reviewed with families during enrollment and whenever updates are made. The provider will also review the plan regularly to ensure procedures remain accurate.
